Requirements:

- Hacked Vita.
- VitaShell.
- rePatch plugin.
- FTP program (WinSCP recommended).
- This English patch.

Extract the zip somewhere on your PC.
Then you need to decrypt game assets:

- Using VitaShell browse ux0:app/.
- Highlight PCSG00009 folder and press Triangle > Open decrypted.
- Press Select and connect Via FTP.
- Using your favorite FTP application (WinSCP recommended) on the PC, browse ux0:app/PCSG00009/.
- Copy toidata_release.l7c and eboot.bin to the 1_PutDescriptedSourceFileHere folder, it should look like this

```
toir_patch-Jan.22.2023/
  |-1_PutDescriptedSourceFileHere/
  |    |-eboot.bin
  |    |-toidata_release.l7c
  |-eboot.xdelta
  |-2_DoubleClickMeToPatchFiles.bat
  |-toidata_release.xdelta
  |-xdelta.exe
```

Now to apply the patch:

- Click the bat file and wait until prompt.
- Move PCSG00009 folder to your rePatch folder or vita3k app folder and overwrite.

Here is a tutorial for smartphone users.
